	ACCESS TO CARE IN COVID: SHIFTING THE RULES OF THE GAME?
	ACCESS TO CARE IN COVID: SHIFTING THE RULES OF THE GAME? A defining feature of Covid-19 in India has been the hurdles faced by ordinary citizens in accessing care. The panel will engage with the following issues
	A defining feature of Covid-19 in India has been the hurdles faced by ordinary citizens in accessing care. The panel will engage with the following issues • Do citizens have a right to affordable care in a public health crisis? • Given the limited capacity & acceptance of the public sector & the dominance of private medicine what are the mechanisms to ensure
	 A defining feature of Covid-19 in India has been the hurdles faced by ordinary citizens in accessing care. The panel will engage with the following issues Do citizens have a right to affordable care in a public health crisis? Given the limited capacity & acceptance of the public sector & the dominance of private medicine what are the mechanisms to ensure access given the cost barrier? Does the state have a right to safeguard access by curbing costs? How far can it go? Are price caps sustainable for the healthcare industry? Are constitutional rights involved in cost curbs but also in denial of care on cost
